| General Mineral Formula: Cu_5FeS_4 |
|---|

| |
|--------------------------------|
| Mineral Chemical Class: |
|--------------------------------|

| |
|--------------------------|
| Specific Gravity: |
|--------------------------|

| |
|------------------|
| Hardness: |
|------------------|

| |
|------------------|
| Cleavage: |
|------------------|

| |
|----------------------------------|
| Luster: Iridescent |
|----------------------------------|

| |
|----------------|
| Streak: |
|----------------|

| |
|---|
| Characteristic Color(s): Peacock Ore: All the colors of the rainbow |
|---|

¹Peacock colors with iridescent luster. Massive habit.

²Peacock Ore In-A-Rock. Characteristic array of colors, massive habit, and with iridescent luster.

Crystal System:

Crystal Class:

Crystal Description (common forms, habit, etc.): Massive Habit
(tiny crystals intergrown in a mass. Indistinguishable)

Environment (where you find the material):

Common Mineral Associations (in samples, also consult text, notes):

Scientific Usage/Significance:

Industrial or Social Use/Significance:

Environmental Significance:
