Ensatite

Benjamin Bass

2 March 2016

General Mineral Formula: $(Mg, Fe)_2Si_2O_6$
Mineral Chemical Class: Inosilicate : single chain pyroxene : clinopyroxene
Specific Gravity:
Hardness: Hardness
Cleavage: Cleavage
Luster: Luster
Streak: Streak
Characteristic Color(s): Color
Crystal System: Crystal System
Crystal Class: Crystal Class

Crystal Description (common forms, habit, etc.): Crystal Description

Environment (where you find the material: Environment

Common Mineral Associations (in samples, also consult text, notes: Common Associations

Scientific Usage/Significance: Scientific Usage/Significance

Industrial or Social Use/Significance: Industiral/Social Use

Environmental Significance: Environmental Significance
